CODESYS V3 Keyboard Shortcuts

Quick Overview

CONTENT

Template: templ_tecdoc_en_V1.0.docx

1   General Approach

Users can adapt the keyboard shortcut settings to their specific needs. The CODESYS Development System provides a number of default shortcuts. These shortcuts can be modified via the menu option "Tools/Customize…/Keyboard". Before assigning a new value to the field "Shortcuts for selected command", make sure that the field "Press shortcut keys" is filled, then press the button "Assign". If the assignment is no longer needed, the shortcut can be removed by pressing the "Remove"-button.

2   Overview

The following assignments are performed automatically during installation of the CODESYS Development System.

View
